Program Information:

- Degree Title & Certificate:
 - Master of Administrative Sciences (MAS) \ Track...
 - Program Duration: 2 years.
 - Required Credit Hours: 36 credit hours.

Program Overview:

The Master of Administrative
Sciences program's flexibility allows
students to design a program of study that fits their
specific needs. Unlike the MBA program, which has specific
elective requirements, the MAS program allows students to choose their
own course of study, pulling courses from a long list of electives which covers a
variety of areas (Tracks) to satisfy elective requirements.

The goal of the program is to help students acquire principles and techniques needed to develop creative solutions in a changing business environment, and contribute quickly to company success within their area of specialization.

An investigation of the Palestinian corporations shows that the majority of corporations prefer their employees to enroll in programs providing knowledge and skills in administrative sciences focusing on one of business areas. Specifically, corporations' interest is focused on the ability to manage time efficiently and effectively, knowledge of technological skills, the ability to solve problems (providing innovative solutions), proficiency in communication skills, the ability to think strategically, proficiency in analytical and research skills, and understanding the moral effects of administrative decisions on society and the surrounding environment.

As a result, MAS is designed to match the corporations' needs and preferences.
